

Installing the Xeos App

Downloading the App

- Download the Xeos Bluetooth App. The latest version of the app can be downloaded from the following link: (<https://manuals.xeostech.com/bluetoothapp/>)
 - Download the .apk file to a computer and transfer it to your Android device's Downloads Folder
 - Or, download the .apk directly using your Android device.

Installing the App

- Allow "Unknown Sources" to allow installation of the app from a browser.
 - Open "Settings"
 - Select "Apps"
 - Select a browser to use to download the .apk
 - Tap "Allow from this source" to the "On" position.
 - Click "OK" if prompted.

You can now install app .apk's from your browser.

- Allow "Unknown Sources" to allow installation from your file manager.
 - Open "Settings"
 - Select "Apps"
 - Select the file manager to install the .apk from (My Files)
 - Tap "Allow from this source" to the "On" position.
 - Click "OK" if prompted.

You can now install app .apk's from your file manager.

Once the above is complete, opening the apk prompts the install of the application.

Reference the [Bluetooth App Guide](#) for app operation.
